Zones can alter if a spill takes place.

**Zone Definitions:**

Zone 0 - An area in which an explosive mixture is continuously present or present for long periods

Zone 1 - An area in which an explosive mixture is likely to occur in normal operation

Zone 2 - An area in which an explosive mixture is not likely to occur in normal operation and if it occurs it will exist only for a short time.

**Equipment Group Numbers for Zones:**

Group I = Zones 0, 1 & 2

Group II = Zones 1 & 2

Group III = Zone 2

## Relationship between ATEX Zones and required equipment

ATEX Zone			Equipment			
Zone: a place in which an explosive atmosphere is...	ATEX Zone		Level of protection is assured in...	Category	Marking	
	Gases	Dusts			Gases	Dusts
continually present	0	20	the event of two faults occurring independently of each other	1	$\text{Ex}$ II 1G	$\text{Ex}$ II 1D
likely to occur in normal operation occasionally	1	21	the event of one equipment fault	2	$\text{Ex}$ II 2G	$\text{Ex}$ II 2D
not likely to occur in normal operation and only for very short durations	2	22	normal operation	3	$\text{Ex}$ II 3G	$\text{Ex}$ II 3D

## Chairman's Message

Dear Valued Customers and Partners,

I am pleased to welcome you to **ENTECH INDUSTRIAL SUPPLIES TRADING**, a leading provider of explosion-proof devices, safety products, detectors, personal protective equipment, and other general consumables. At **ENTECH INDUSTRIAL SUPPLIES TRADING**, we are committed to providing our customers with the highest quality products and services that promote safety and reliability in their workplaces and communities.

At **ENTECH INDUSTRIAL SUPPLIES TRADING**, our mission is to provide the highest quality safety products and services to our customers, to help them create safe and secure environments in their workplaces and communities. As the Chairman of **ENTECH INDUSTRIAL SUPPLIES TRADING**, I am proud to lead a team of dedicated professionals who share a common commitment to safety, quality, and innovation.

At our core, we believe that safety is a fundamental human right, and we are passionate about helping our customers achieve their safety goals. We are committed to leveraging the latest technologies, best practices, and industry standards to develop products and services that meet and exceed our customers' expectations.

We recognize that our success is dependent on the success of our customers, and we strive to build strong, long-lasting partnerships with them. We take pride in our ability to work collaboratively with our customers to identify their specific safety needs and provide tailored solutions that meet those needs.

As we continue to grow and expand, we remain committed to our values of integrity, excellence, and customer satisfaction. We are excited about the future, and we look forward to partnering with you to create safer, healthier, and more secure environments.

Thank you for your interest in **ENTECH INDUSTRIAL SUPPLIES TRADING**. We are honored to have the opportunity to serve you.

Sincerely,

The Chairman

## EN standards for protective gloves

- CAT I** Glove covers the minimal risks when the glove is used for comfort only. If the job presents any kind of danger, the worker has to be equipped with a CAT II or III.
- CAT II** Glove have been tested and certified by an independent notified testing company. They comply to mechanical risks, a type test according to EN388, directive 89/686EEC.
- CAT III** Glove used in hazardous environments and significant, irreversible risk for serious injury.

**EN 420** Basic requirements for gloves.  
Here points are glove sizes, PH, chromium (VI) content set or dexterity

**EN 511** Protection against cold  
a. resistant to convective cold  
b. resistant to contact cold  
c. water permeability

**EN 407** Protection against heat and fire  
(for example, welding gloves)

**EN 374** Bacteriological contamination

**EN 388** Mechanical risks

### General Purpose

- . Lining: 15 gauge nylon and spandex
- . Coating: High technology foam nitrile palm coated
- . Color: Grey/Black
- . Size: S, M, L, XL, XXL
- . Norm: EN 420, EN 388: 4121 X
- . Features: Breathable, Anti-slip, High dexterity and Flexibility
- . Application: Manufacturing, Automotive, Aircraft assembly and Maintenance

### Precision Purpose

- . Lining: 15 gauge nylon and spandex Maxi Flexible use
- . Coating: High technology water spray foam nitrile coating
- . Color: Grey/Black
- . Size: S, M, L, XL, XXL
- . Norm: EN 420, EN 388: 4121 X
- . Features: Breathable, Anti-slip, High dexterity and Flexibility
- . Application: Manufacturing, Automotive, Aircraft assembly & Maintenance

**AG 32 874**

**AG 786**

### Cut Protection

- . Lining: 13 gauge grey black nylon/HPPE/Steel/Glass fiber liner
- . Coating: Black polyurethane coating
- . Color: Grey/Black
- . Size: S, M, L, XL, XXL
- . Features: Cut resistant, Good abrasion, High dexterity, Anti-slip
- . Application: Steel industry, Handling sharp or Irregular edged metal parts, Plastic injection and Moulding

### Impact Protection

- . Lining: 13 gauge grey black nylon/HPPE/Steel/Glass fiber liner
- . Plam: Sandy finish black coating over the plam and fingers
- . TPR: Black/Yellow/Green on back. Black aramid fabric at thumb crotch
- . Color: Grey/Black & TPR Black/ Yellow/Green Hi Viz
- . Size: S, M, L, XL, XXL
- . Features: High CUT **RESISTANT LEVEL A8**, Anti vibration with pad, Anti oil, Impact & Slip
- . Application: Oil & Gas, Construction and Mining, Automotive & Heavy Equipment Operation

**AG 1210**

\*Optional

**NY 1350 GR**

### General Purpose

- . Lining: 13 gauge nylon (polyester available)
- . Coating: Nitrile plam coated
- . Color: Grey/Black
- . Size: S, M, L, XL, XXL
- . Norm: EN 420, EN 388: 4121 X
- . Features: Good abrasion, High dexterity and Flexibility  
Anti-Slip, Anti-Oil
- . Application: Manufacturing, Automotive, Aircraft assembly, Logistics, General work

### Cut Protection

- . Lining: 13 gauge nylon and HPPE and glassfiber
- . Coating: Polyurethane(PU)
- . Color: Grey
- . Size: S, M, L, XL, XXL
- . Norm: EN 420, EN 388: 4442 X
- . Features: Cut resistant, Good abrasion, High dexterity, Anti-Slip
- . Application: Mechanic, Aeronautics & Automotvie industry, Carft, Glass Manufacturing

**DY 110 PU H**

### Cut Protection

**DY 1350 FH**

- . Lining: 13 gauge nylon and HPPE Glass Fiber / Steel Liner
- . Coating: Sandy nitrile
- . Color: Grey /Black
- . Size: S, M, L, XL, XXL
- . Features: Cut resistant, Good abrasion, High dexterity, Anti-Slip
- . Application: Mechanic, Aeronautics & Automotive Industry, Craft, Glass Manufacturing

**DY 1350 AC H**

### Impact Protection

- . Lining: 13 gauge grey black nylon/HPPE/Glass fiber liner
- . Coating: Sandy finish nitrile, Anti vibration padding
- . Back: TPR, Magic Buckle
- . Color: Hi-Viz yellow / Black
- . Size: S, M, L, XL, XXL
- . Features: Anti Vibration, Anti-Oil, Anti-Imapct, Anti-Slip, High Cut Resistant level
- . Application: Oil & Gas, Construction and Minig, Automotive, Heavy Equipment Operation

# Safety Icons Glossary: What They Indicate

## EN 343

Waterproof and breathable protective clothing.  
The EN 343 class 3:3 indicates the highest levels of waterproofness and breathability.

## EN 20471

High visibility clothing.  
EN ISO 20471 specifies the requirements for high visibility clothing to the visual presence of the passive road user in both day light and low light situations.

## AS/NZS 1906.4.2010

Retroreflective materials and devices for road traffic control purposes.  
Specifies the photometric, colorimetric and physical property requirements for high-visibility materials for outdoor daytime use where the wearer needs to be highly visible.

## RIS-3279-TOM

Rail industry standard for high visibility clothing.  
RIS-3279-TOM specifies the minimum requirements for high visibility clothing that is to be provided for wearing by people when on the lineside or on or near the line of an operational railway.

## ANSI/ISEA 107/Class 3 Compliant

American National Standard for High-Visibility Safety Apparel. - ANSI/ISEA 107 presents three performance classes of garments based on the number of visible materials and design attributes incorporated into the final configuration, and identifies garment types based on expected use settings and work activities being performed.

## EN 11611

Protective clothing for use in welding and allied processes.  
EN 11611 specifies the requirements for welding clothing, including, welding hoods, aprons, sleeves and gaiters.

## EN 11612

Protective clothing to protect against heat and flame.  
EN 11612 specifies the requirements for heat and flame-resistant clothing that covers the entire body, excluding hands, feet, neck and head.

## IEC 61482

Protective clothing with protection against the thermal hazards of an electric arc.  
IEC 61482 specifies requirements for flame and heat-resistant protective workwear where there is also the risk of an electric arc.

## NFPA 70E

Standard for electrical safety in the workplace.  
NFPA 70E specifies the requirements for safe work practices to protect personnel by reducing exposure to major electrical hazards such as shock, electrocution, arc flash, and arc blast.

## UL Classified

UL Classification specifies that UL has tested and evaluated samples of a product with respect to certain properties of the product.

## EN 1149-5

Protective clothing with electrostatic properties.  
EN 1149-5 specifies the properties for protective wear used in explosive atmospheres. The clothing is part of an earthed system to avoid ignition sparks.

## NFPA 2112

American Flame Resistance Standard for personal fire-resistant protective garments.  
The NFPA 2112 standard specifies the basic minimum requirements and test methods for flame resistance for personal fire-resistant protective garments.

## EN 469 : 2005+A1:2006

This European Standard specifies minimum levels of performance requirements for protective clothing to be worn during firefighting operations and associated activities such as e.g. rescue work, assistance during disasters. The described clothing is not meant to protect against deliberate chemical and/or gas cleaning operations.
